# Executive Summary – Q1-2025

## Sales Decline as LUVE Awaits Backlog Surge to Boost Revenue Profitability Holds Steady Despite Lower Volumes

### Economics

- In Q1-25, sales decreased by 4.6%, at FX constant –5.4% (-5.5% volume and mix, +0.1% price)
- Order book at € 210.4 M +24.6% vs Q1-24
- EBITDA adjusted at 13.5% in line with Q1-24

### Financials

- Leverage at 1.28x EBITDA adj LTM (1.70x in Q1-24)
- Cash flow from operation improved by 1,2% to € 17.6 M
- LTM net cash generation adjusted equal to € 64.1 M (vs € 48.5 M in Q1-24)

### Strategy

- Focus on order intake to return to growth in the year
- Consolidation of operational improvements to enhance profitability
- Growth Capex in USA for datacenter and industrial cooling

# Sales by application and market

## Benefit of Diversification of Applications

### SBU components: -0.2% in Q1-25

- *Good growth in refrigeration and tumble dryers*
- *First signs of recovery in heat pump heat exchangers*
- *Negative trend in air conditioning and mobile applications*

### SBU cooling systems: -11.5% in Q1-25

- *Delays in major projects, particularly in the air conditioning and industrial cooling segments*
- *Q1-25 closed with the highest order book value in the history of the Business Unit*
- *Together with the numerous projects currently under negotiation, this suggests that the year-end sales targets are still achievable.*

### By geography:

- *74.8% of sales in EU.*
- *USA and China represents 3.2% and 1.7% of products sales respectively*

### High customer diversification:

- *Largest customer : 4.2% of total sales*
- *Largest 10 customers: 30% of total sales*

# EBITDA Bridge Analysis Q1-25 vs Q1-24

- In Q1-25 growth of gross margin (+259 bps) and added value (+168 bps) vs Q1-24
- Lower absorption of fixed labor costs due to lower volumes
- No NRI in Q1-24. In Q1-25 NRI due to start-up costs of the air-cooled business in USA

- In Q1-25 cash flow from operations at 13.0% of sales (12.3% in Q1-24) + 1.2%
- LTM net cash generation adjusted equal to €64.1 M
- Cash debt (excluding IFRS 16) increased due to working capital seasonality

# Future Developments and Closing Remarks

## Strategy

- Focus on Datacenter and Industrial Projects
- Focus on automation, process optimization and cost reduction
- Focus on supply chain optimization
- Further product range rationalization
- Second stage of plant expansion in US in progress
- New capex review according to markets developments

## Markets

- M/L Term growth sustained by secular trends
- Since Q3 23 soft markets in heat pumps (potential recovery from H2-2025)
- Nuclear applications in progress: sales impact will start in H2-2025.

## M&A

- Continuous search of M&A opportunities with strong strategic rationale

## Financials

- Focus on costs efficiency and margin expansion
- Focus on deleverage and further increase of debt average duration
- Focus on net cash generation

# Strategy

---

## Create sustainable competitive advantage through:

- Product focus and innovation
- Technology enhancements
- Production plants efficiency and flexibility
- First mover in "green tech"

## Reduce risk profile through:

- Widening product applications in uncorrelated sectors
- Increasing internationalization

## Geographical focus

- USA
- Asia
- Developing countries

## Disciplined M&A activity (industrial focus and valuation)

# LU-VE's Medium Term Value Creation Framework

---

- High Single Digit growth in sales volume (organic)
- EBITDA margin toward 14/15% thanks to scale and efficiency capex
- NWC on sales: Mid Double Digit (net of extraordinary fluctuation)
- Growth capex: € 20/30 m p.a.
- Tax rate: 20-21%
- ESG targets in progress
- Capital allocation
  - NFD/EBITDA <2

# The Pricing Power in 2022

## EBITDA FY 2022 vs 2021 + 29.6%

- EBITDA adjusted grew by 29.6% thanks to volumes increase and pricing power
- In 2022, non-recurring items are M&A transaction costs and extraordinary bonuses to employees (no adjustments in 2021)

# EBITDA 2023 Bridge Analysis

FY 2023 vs 2022 = + 1.7%

FY 2023 vs 2018 = + 108.6%

- EBITDA adjusted grew by 1.7% thanks to cost savings
- In 2023, non-recurring items are new plant in Belluno start-up costs and extraordinary contribution to flooded populations of Emilia Romagna

# LU-VE Group Approach to ESG Topics

# Our Sustainability Vision in 4 pillars

**Our vision** is linked to the **material topics** that we pursue so that this vision can take shape in the real world. The **Sustainable Development Goals (SDGs)** have been defined at global level by **the United Nations** to identify global priorities for development by the end of 2030.

# The Sustainability Governance

**In 2022 LU-VE Group set up a corporate Sustainability Steering Committee:** this is where the strategic lines will be plotted and the progress of our performance will be evaluated. The new figure of Group General Manager (GM), introduced in 2023, has been also involved in the Corporate Sustainability Steering Committee which is regularly attended by CEO, CSDO, GM, CFLO, Investor Relation and Sustainability Office.

# The Sustainability Plan

The 2024 was the second year of implementation of **LU-VE Group's 2023-2025 Sustainability Plan**. It was prepared by the Corporate Sustainability Steering Committee, reviewed by the Control and Risk Committee, and approved by the Board of Directors in February 2023.  
**All the targets set for 2024 have been met.**

# Climate change mitigation targets

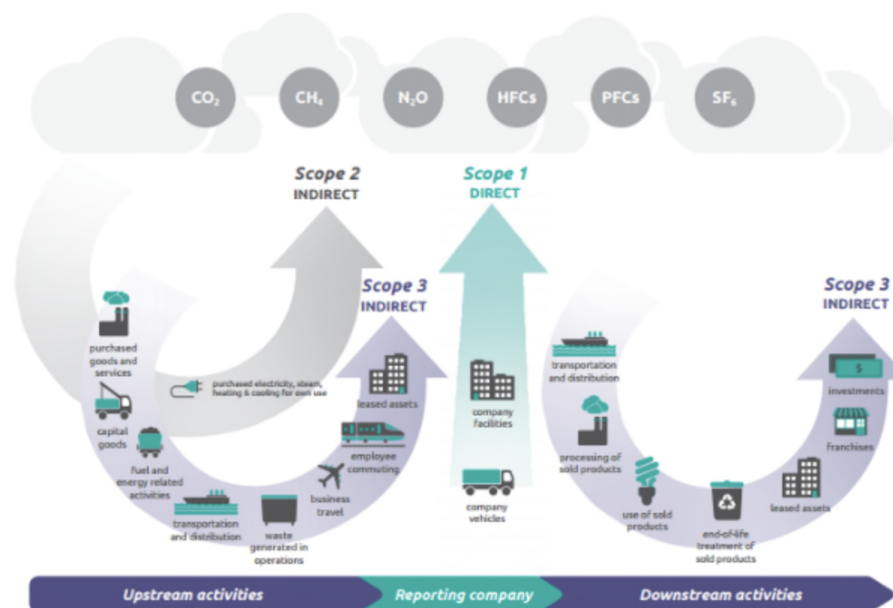

Considering climate targets, LU-VE Group:

**A. Reduced its greenhouse gas emissions (Scope 1 and Scope 2 according to the Market-based methodology) by 15%, considering the 2022 baseline.**

Achievement of the target - defined through science-based methodology - was possible mainly through the use of electric energy from renewable sources certified through Guarantees of Origin or produced through on-site photovoltaic plants, as well as through energy efficiency initiatives.

**B. Pledged to establish a plan to reduce Scope 3 greenhouse gas emissions over the next two years.**

In addition, for the first time, in the FY2024 Consolidated Sustainability Statement (Integrated Annual Report), the Group is reporting data on its Scope 3 emissions. The Scope 3 emissions categories most relevant for LU-VE Group are related to clients' use of products (cat. 11 of GHG Protocol) and materials purchased (cat. 1 of GHG Protocol).

# Resources for climate change mitigation and adaptation

As part of the **2026-2028 Business Plan**, LU-VE Group has planned investments (CAPEX) with the aim of mitigating impacts from climate change mitigation and adaptation with a total value of €8.5 million, of which

- A. Climate change mitigation: €7 million** for Scope 1 and Scope 2 emission reduction actions through investments in advanced technologies for climate-friendly production processes
- B. Climate change adaptations: €1.5 million** for adaptation of plants to the effects of climate change, with special reference to adaptation works to mitigate flooding risks and increase site protection during heavy precipitation and to site cooling to mitigate the negative effects of heat waves.

# EU Taxonomy and the eligible activities of the LU-VE Group

**LU-VE Group's activities eligible to the EU Taxonomy, because of its contribution to the objectives: «Climate Change Mitigation» (CCM)** - Delegated Regulation (EU) 2023/2485 and **«Transition to a circular economy» (CE)** - Delegated Regulation (EU) 2023/2486:

- Equipment for the production of hydrogen - CCM 3.2 - ***new activity***
- Heat exchangers with high energy efficiency - CCM 3.5
- Products using CO<sub>2</sub> as a refrigerant fluid - CCM 3.6
- Products using other natural refrigerant fluids (hydrocarbons, ammonia, glycol water) - CCM 3.6
- Transport by motorbikes, cars and light commercial vehicles - CCM 6.5
- Constructions of new buildings – CCM/CE 7.1
- Renovation and efficiency of buildings – CCM/CE 7.2
- Installation, maintenance and repair of ventilation systems - CCM 7.3,
- Installation, maintenance and repair of Building Management Systems (BMS) – CCM 7.5 – ***new activity***
- Installation, maintenance and repair of photovoltaic systems – CCM 7.6

LU-VE Group – Eligibility data	KPI	2024	2023
	Turnover	36.4%	34.7%
	CAPEX	40.9%	29.3%
	OPEX	36.4%	36.4%

# Climate Risks analysis for the Industrial Plan 2025-2028

## PHYSICAL CLIMATE RISKS ANALYSIS

- LU-VE Group already required a risk assessment for its production facilities in 2022. This analysis is considered up-to-date and also applicable for the financial year 2024 as it is based on **IPCC (Intergovernmental Panel on Climate Change)** scenarios, categories of physical climate risks, calculation methodologies and time horizons still in line with the state of the art and the context in which the Group operates.
- The different future scenarios were based on internationally recognised climate models based on greenhouse gas concentration pathways (Representative Concentration Pathways - RPC) developed by the **IPCC** with particular reference to the **RCP 2.6 and RCP 4.5 scenarios**. Considering the time frame, the simulations were performed with a **horizon up to 2035**.
- The analysis showed that the risks that will have the greatest influence on the Group are **temperature variability, intense precipitation and precipitation variability**. Vice versa, the exposure to certain other risks, e.g. drought and fire risk, are not expected to be material to the Group's operating assets.

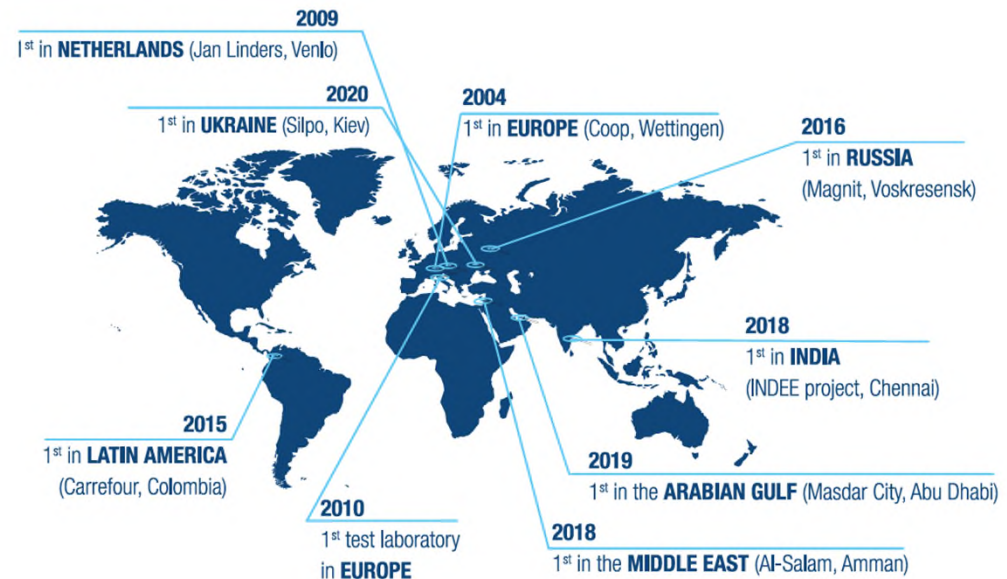

## TRANSITION CLIMATE RISKS - Analysis update

- The various types of risk - market, technological, legal/policy and reputation - have been evaluated according to their potential impact on the business and the Group's ability to cope with them over time. As an example, market risks related to **increases in production and transport costs**, due to specific market conditions and the introduction of new regulations (such as Carbon Border Adjustment Mechanism at European level) have been assessed, as well as the **demand for products with less emission impact** also due to the tightening of regulations and directives aligned to climate policies, such as the F-Gas Regulation.

# Helping Customers Reach their Sustainability goals

## FIRST MOVER IN GREEN TECH

Over the last 10 years, LU-VE Group's technological leadership has been strengthened thanks to the development fluids and energy-efficient motors.

% of sales of products by type of refrigerants

% of sales with EC/AC motors

The graph “% of sales with EC/AC motors” shows for 2022 a trend reversal due to the contingent lack of electronic components found in EC motors that has forced the market to opt for AC motors (that do not contain these components).

# Sustainability Ambassadors' Journey: leverage our sustainability culture

The “**Sustainability Ambassadors' Journey**“, our initiative launched globally in 2023 to increase sustainability awareness within the LU-VE Group and accelerate sustainable change within the company, continued in 2024.

Among the various spontaneous applications received, a total of 80 employees were selected from different companies within the Group and from various departments and functions. The training, discussion, and dialogue activities covered five main areas: **climate crisis, energy market, human rights, circular economy, and sustainability communication.**

At the end of the first phase, the "Sustainability Ambassadors' Journey" continued with two main modules:

- i) through the **Climate Fresk Path**, employees can participate in an intensive training to become certified Climate Fresk facilitators, with the aim of guiding their colleagues in workshops on climate change and its social impacts;
- ii) by participating in the **Sustainability Lab**, employees joined workgroups to generate ideas and proposals for sustainability projects to be developed within the company.

The activities are ongoing.

# Decarbonization and heat pumps

- Heat pumps are a decisive element for achieving the goal of **zero “net carbon emissions”**
- LU-VE Group has designed special products to make the **best use** of heat sources for heat pumps: thus supporting this market which in 2022 recorded a **strong growth**

## HEAT PUMPS FOR DISTRICT HEATING

- LU-VE Group conducted an experimental campaign in 2022 on a variety of aerodynamic layouts of a plant in Denmark and contributed to the development of a new configuration of coolers capable of **reducing the energy consumption of the heat exchanger by up to 21%.**
- The full results were presented during the “**Gustav Lorenzen**” international conference, the most important on natural refrigerant fluids.

## HEAT PUMPS FOR RESIDENTIAL USE

- **LU-VE Group made R&D activities on seeking solutions capable of reducing the load of specific refrigerant fluids for the use of R290 when presenting the 4mm diameter tube at Chillventa 2022.**
- This innovation endows LU-VE Group products with the highest performance in terms of both yield and sustainability.

Heat pumps allow heat to be extracted from a **natural source** (air, water or ground) and make it available at the desired temperature. They also allow recovery of the residual heat, which can then be used for heating to increase the **system's efficiency**

## Main financial terms

- Acquisition completed on 30<sup>th</sup> of March 2022
- Acquisition of 75%, plus put&call on the remaining 25% within 5 years
- Cash out at closing equal to € 8.1 M
- EBITDA multiple = **7,35x** average 2020/2021 adjusted EBITDA
- Remaining 25% acquired in 2024 for a value of € 7.4 M
- **Financial highlights 2021:**
  - Sales = € 26 M
  - EBITDA = € 2.7 M

## Strategic rationale

- Refrion specializes in the production and marketing of air heat exchangers with **adiabatic technology**, which enables reductions to be made in energy consumption, water consumption, and noise emissions
- Technology of heat exchangers with **oval tubes**
- Limited customer **overlapping**
- Heat exchangers for **nuclear plants**
- One of the largest **climatic test chambers** in Europe

# ACC (Italy) (2022)

## Main financial terms

- Transaction completed on 29<sup>th</sup> of July 2022
- Contracting of selected assets and employees of former ACC under receivership (based on Belluno – Italy)
- Total capex on the site up to € 9 M in 3 years
- Hiring a certain number of former blue collars of ACC, benefitting from subsidies from the Italian government

## Strategic rationale

- Access to **modern industrial plant** at cheap conditions (40.000 mq)
- **Hiring skilled people** at reduced costs
- Opportunity of rationalization of **logistic activities** of the nearby plant of LU-VE

# Tecnair LV (Italy) (2022) - Divestiture

---

## Main financial terms

- Transaction completed on 21<sup>st</sup> of March 2022
- Sale to Systemair of the entire participation (80%) in Tecnair LV
- **Transfer of all the employees**
- Cash-in at closing € 12,9 M
- EBITDA multiple = 12,5x 2021 adjusted EBITDA
- **Financial highlights 2021:**
  - Sales = € 12,0 M
  - EBITDA = € 1,2 M

## Strategic rationale

- **Limited integration** with the LUVE Group
- Product range in **competition** with large customers of LUVE
- Technological developments toward **outdoor machines** for data centers
- Limited growth in the last years
- Strategic **long term supply** agreement of components with Systemair

# Acquisition of Alfa Laval Air Heat Exchanger Business: Overview (2019)

---

- On December 12<sup>th</sup>, 2018, Lu-Ve signed a binding contract to acquire 100% of Alfa Laval Air Heat Exchanger division (“AL Air”) of Alfa Laval Group. The acquisition was completed on April 30<sup>th</sup>, 2019 <sup>(1)</sup>
- Purchase price paid at closing amounted to €43.6m. An additional payment of €7.5m was made on April 30<sup>th</sup>, 2020.
  - 6.5x Adj. EBITDA multiple over the period 2018-2019
  - Final price agreed on February 4<sup>th</sup>, 2020
- AL Air manufactures air-cooled products for industrial process cooling, refrigeration and HVAC applications
- In the two-year period 2018-19, AL Air reported ca. €100m sales and an EBITDA margin of 8.0% with a Sales CAGR of 8.9% over the last 3-year period
- AL Air brings to Lu-Ve Group:
  - World class customers in Europe, US and India
  - 3 state-of-the-art manufacturing plants in Italy, Finland and India with ~400 people
  - An ideal base to expand (i) market presence in the industrial cooling and refrigeration segment in Europe and (ii) production in India

---

1) Subject to 2018 EBITDA review and post closing adjustments

# Acquisition of Alfa Laval Air Heat Exchanger Business: Rationale (2019)

---

- Becoming the third largest player in the world in the air-cooled products
- Strengthening market position in Europe in industrial cooling business unit, achieving a leading position
- Enlargement of product applications (engine cooling, power converter and process cooling)
- Limited customers overlapping
- Strong management team with international experience
- Expansion in the Indian market related to the cold chain infrastructure
- Opportunities of synergies as result of plant specialization, marketing efforts and costs rationalization

# ZHT (USA) (2018)

---

- On June 26, 2018, LUV completed the acquisition of Zyklus Heat Transfer Inc (ZHT), based in Jacksonville (Texas)
- Luve acquired 100%
- ZHT is specialized on heat exchanger for the US market
- Mr. Zachary Riddleseperger – founder and 100% owner – remains as VP Operation
- Three years earn-out scheme based on EBITDA
- 2017 turnover: USD 10.3 M
- Average growth rate previous two years: 12%
- 2017 adjusted EBITDA: USD 1.7 M (16.5%)
- At December 2017 adjusted net financial debt was USD 3,4 M
- Price paid for 100%: USD 10 M
- 2017 EBITDA multiple paid: 7,9x

# Spirotech (India) (2016)

- Binding contract to acquire 95% of Spirotech signed on 18/9/2016
- Spirotech is a leading and fast-growing Indian producer of heat exchanger for HVAC industry, home appliances and transportation:
  - turnover of € 21 millions with an average EBITDA margin > 20%
  - doubled the turnover during the last 5 years
  - world class customers in Europe, US and India
  - strong management team with international experience
  - state of the art manufacturing plant with expansion opportunities
- Ideal base to expand production in India, to benefit from long term trend in creation and expansion of cold chain in India and Asia
- **Total consideration :**
  - 7,3x FY16 EBITDA
- **Strategic rationale of the acquisition:**
  - Expansion of Spirotech customer basis thanks to LUVE sales network
  - Expansion in the Indian market with LUVE products related to the cold chain infrastructure
  - Transfer of customers/products from other Group European plants based on logistic and technological evaluation
  - Expansion in Middle East due do the logistic advantage
